CORNELL COOPERATIVE EXTENSION & ACORN LANDSCAPING EDUCATE ROCHESTER

Acorn Landscaping Donates \$4,000 Water Feature to Monroe County Extension

Rochester, NY – Acorn Landscaping teamed with Cornell Cooperative Extension (CCE) to bring a functional water feature to their Monroe County Extension. The water feature will be incorporated into the community education program at the CCE, including the 4-H Youth Development Program and consumer horticulture courses.

“This will be an integral part of the (Cornell Cooperative) Extension’s landscape, and offer community members the ability to experience a functional water feature while at the CCE,” said Karen Klingenberg, CCE Consumer Horticulture Educator.

Completed in October, the \$4,000 project was fully funded by Acorn Landscaping President, Tom Warmerdam. As a certified Aquascape Water Garden Installer, Warmerdam brought over twenty years of custom landscape and water feature design to the project.

*Community members interested in courses at Cornell Cooperative can contact the Monroe County Extension at 585-461-1000.
